

IMPORTANT SAFETY INFORMATION – CAUTION: READ INSTRUCTIONS CAREFULLY

This product is designed for use in 120volt, 60HZ fused circuits. **This device must be used with LITESPEED products EZT-105 & EZT-200 watt transformers only.** Proper installation is essential for safe operation. All electrical connections must be in accor-

OPERATION

Follow installation instructions for installing EZT-105/EZT-200. Plug touch control EZD/S-2 into transformer. Run touch control wire to desired location and attach metal plate (make sure wire is secured to metal plate). Cover with plastic frame and attach to wall. The switch is activated by passing energy to the touch control (receiver). When touching the metal wall plate the energy around you and your body sends a signal to the switch. This energy activates the control switch. Touch plate with fingers each time to operate: **LOW-MEDIUM-HIGH-OFF**

NOTE: DO NOT USE IN WET LOCATIONS- DO NOT COVER WITH INSULATION OR DRAPES.

OPERATION

1. Plug EZD/S-2 (control) into transformer.
2. Run touch wire to desired location (see illustration 2).

dance with local codes, ordinances and the national electric code. If you are unfamiliar with the methods of installing electrical wiring secure the services of a qualified licensed electrician.

3. Attach wire to metal plate (wire must make contact with metal plate) see illustration 1.
4. Mount to wall with plastic cover (no J-box necessary).
5. Plug cord into outlet.
6. Touch metal plate to operate.
